### **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 9, 2007 has been entered.

Claims 1, 6-15 and 20-25 are pending.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6-15, 20 and 22-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Prakash et al. (U.S. Pat. 6,455,200 B1).

Regarding claims 1 and 15, Prakash et al. teaches HMOPA as an additive to a lithium ion battery. See the Abstract and col. 4 lines 39-46.

For claims 6, 7 and 24, the lithium salt is LiPF<sub>6</sub>. See col. 3 line 7.

Application/Control Number: 10/600,211

Art Unit: 1745

For claims 8-14 and 25, the solvent is a mixture of ethylene carbonate and dimethyl carbonate. See col. 3 line 6 et seq.

As to claims 20, 22 and 23, the anode and cathode are lithium intercalation compounds, the latter electrode such as LiNi<sub>0.8</sub>Co<sub>0.2</sub>O<sub>2</sub>. See col. 3 line 45 et seq.

## Claim Rejections - 35 USC § 103

The rejection of claims 1, 6-15 and 20-25 under 35 U.S.C. 103(a) based on Matsufuji et al. (U.S. Pat. 5,759,714) and Anpo (JP 07-153487) has been withdrawn.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 6-15 and 20-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsufuji et al. (U.S. Pat. 5,759,714) in view of Kita et al. (U.S. Pat. 5,085,954).

Matsufuji et al. has been discussed in detail in the prior Office action and is applied for the reasons of record. The examiner notes the present amendment to the claims now positively reciting, *inter alia*, hexamethylphosphoramide (HMPA) as an additive. While Matsufuji et al. does not explicitly teach HMPA, Kita et al. teaches HMPA as an additive to a lithium battery. See col. 1 line 38 et seq. The skilled artisan would find obvious to modify Matsufuji et al.'s invention by employing HMPA. The motivation for such a modification would be to "improve the thermal stability of LiPF<sub>6</sub>"—notably the same lithium salt used by Matsufuji et al. (ib.)

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julian Mercado whose telephone number is (571) 272-1289. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan, can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
